Approximation Polynomials and Dirichlet L -functions Behavior in the Critical Strip

O. A. Matveeva

Saratov State University, Russia, 410012, Saratov, Astrakhanskaya st., 83, olga.matveeva.0@gmail.com

In this paper a sequence of Dirichlet polynomials that approximate Dirichlet L -functions is constructed. This allows to calculate zeros of L -functions in an effective way and make an assumptions about Dirichlet L -function behavior in the critical strip.

Key words: Dirichlet L -functions, approximation polynoms.
